National Wildlife Day,

2021-September-4,

National Wildlife Day is celebrated on both February 22 and September 4 every year since 2005, to double the effort to help bring awareness of the plight of wild animals around the globe. It encourages wildlife lovers to stand up and fight for animals that need a voice, to visit their local zoo(Nainital) and donate what they can to make a difference in the lives of our beloved animal friends.

This year we celebrate this day this for the care and protection of the animals in need also spreading gratitude and awareness for the wonderful small or big, animal species around us, our companions on this big blue planet. The Nainital Zoo has been operating for over 25 years, and most of the animals here have already lived past the life expectancy they would have in the wild. All residents of the zoo cannot be released into the wild due to an injury, illness, or habituation. The only way we as humans can prevent animals from becoming endangered and can help endangered species and individual animals that need us is to know what we're doing, to understand the plight of the animals, to understand how they get to a zoological park like ours.

In our day to day life we come across different terms like habitat destruction, species endangerment, and biodiversity loss also seen regularly in the papers today. But it doesn't have to be like this anymore. We ourselves can change this by educating the society as making people know and learn what methods can be adopted and measures taken for safeguard & saving these animal species is must. Certain events are organized by our staff in zoo campus for the same. Also one can help by adopting an animal with our adoption scheme at our Zoo to provide best care and services for all animals by giving best quality of food for nutritional requirements, medical care, enrichment of animal enclosure.

For more information on adoption visit our website, <https://www.nainitalzoo.org.in>
