World Nature Conservation Day

28th July, 2021

World Nature Conservation Day acknowledges that a healthy environment is the foundation for a stable and healthy society and to raise awareness about protecting the natural resources. Nature is facing huge problems like deforestation and illegal wildlife trade on the rise. Everyone must promote environment-friendly activities in their daily life to lead a Green Lifestyle. Swachh Bharat Abhiyaan, Project Tiger, Mangroves for the future (MFF) are some initiatives that India has undertaken to conserve nature.

Earth provide us all the basic necessities to live like water, air, soil, minerals, trees, animals, food, so it is required that we keep our nature clean and healthy. As there is no immediate danger, people take nature for granted to exploit it for money. On World Nature Conservation Day, let us make a conscious effort to conserve nature around the world and to spread awareness around people around you use your social media handle using the hashtag **#WorldNatureConservationDay**

“Earth provides enough to satisfy every man's needs, but not every man's greed.” — Mahatma Gandhi

Importance of Nature Conservation

- To Protect wildlife
- To Protect the Earth
- For Human Health
- To support life by supporting ecological balance

Conservation is also necessary to avoid any kind of future pandemic like Covid-19 due to which millions of creatures have lost their lives, likely to be caused by human activities as human have destroyed most of the animal homes due to growing human settlements and land-clearing for agriculture and also with decreasing biodiversity, disease vectors – those animals that carry and transmit an infectious pathogen are more likely to feed on vertebrates than other species which are no longer as abundant. Those other species then become the primary reservoir of the pathogen.

Let us come together and make an effort to contribute to the local, national, or global levels in conserving nature. It will not only benefit our present generation but also for future generations.
